

Bridging the Digital Divide

Through the True Internationalization of Email

Xgenplus provides email solutions for the global market, supporting over 50 million users including governments, telecoms, enterprises and individuals. As a company based in India, a country with 1.2 billion people, 22 official languages in 12 different scripts and just 12 percent native English speakers, the team at Xgen inherently understood the need for people to have email addresses in their native scripts. As the online population grows, there is an increasing need to make the Internet more accessible in local languages and email address internationalization (EAI) has an important role to play.

IDN & EAI Compatible

The introduction of internationalized domain names (IDNs) and the Indian government's launch of .भारत (.bharat), led to Xgen focusing on internationalization issues of email addresses. EAI is part of the broader Universal Acceptance (UA) initiative, which provides a gateway to the next billion Internet users by ensuring that all domain names and email addresses can be used by all Internet Enabled applications, devices and systems. Xgenplus is completely IDN Compatible and EAI enabled solution. As EAI Level Xgenplus Stands on highest Platinum level.

XGENPLUS PROVIDES A TOTAL END TO END MESSAGING SOLUTION

Some of the Unique Features

IDN Email Address Compatible:

XgenPlus Supports International Domain Name Email (IDN email or Intl email) . The Email Address Which Contains International Characters i.e (अ@अशोका.भारत, 一个@阿育王. 巴拉特, একটা@অশোক.ভারত) and allows Individuals and Organisations to have Email ID in their Preferred Regional Language Domain.

Retrieve Deleted Emails:

Organizations now can ensure no loss of email and retain every kind of email for as long as organization wants. XgenPlus can ensure that no email is permanently lost and can be made available as and when required.

Set user Control rights Privileges for receiver:

While user is sending an email to any of his colleague in the organization, he can define the right whether, recipient can Delete / Fwd / Reply or print this email or not. off course from the sent email, sender may reset those rights at later stage.

Block bulk email through Spam Promo:

User can set filter as "Move spam or bulk mail to spam-promo folder", Once this filter will be applied all promotional emails/bulk emails/spam emails will sent to Spam promo folder directly

Alias: Multiple Email ID in one Mailbox

This feature is very useful when organization has multiple websites/ domains and person has dual role. In other scenario where a user is given English+Linguistic Email address i.e support@xgenplus.com, संपर्क@एक्सजेनप्लस.भारत and both can be made accessible within one mailbox.

FIT FOR ALL

XgenPlus integrates in all kind Of organizations and business environment, It supports multiple operating systems, i.e. Linux, FreeBSD, Solaris, Unix, SUSE or any other Unix like operating system which can support JDK 1.4 & above

ADVANCE WEB MAIL

XgenPlus webmail is truly high-tech pace of entire software. It's features are unparallel to any competition and offer great deal of productivity enhancing, time saving features along with easy admin control for the organization. Entire webmail is customizable to the organization needs and may offer very organization centric services to the organization email users.

MOST SECURE (SMIME/PGP, SSL, TLS, CRAM MD5, BIOMETRIC)

XgenPlus web mail offers the entire PGP key pair management through web and needs no software to be downloaded on the client PC. All public key becomes automatically available to all internal users. (organization domain)
